

Sustainable Farming

Interactive Expert Interviews

**HEALTHY
SOIL BIOMES**

Challenges

The organization's mission is to accelerate the world's transition to sustainable agriculture by spreading Healthy Soil Biomes methods to solve climate change and bring abundance, dignity, and equality to farmers worldwide.

Results

StoryFile filmed and produced 5 interviews featuring experts in farming and sustainability. You can meet and interact with each individual to learn more about bioreactors, farming, soil, and biodiversity.

Connecting the global audience to farming and sustainability best practices.

In 2021, Healthy Soil Biomes began working with StoryFile to reimagine a way to connect with a global audience on farming and sustainability. The organization's mission is to accelerate the world's transition to sustainable agriculture by spreading Healthy Soil Biomes' methods to solve climate change and bring abundance, dignity, and equality to farmers worldwide. You can meet and interact with each individual to learn more about bioreactors, farming, soil, and biodiversity. As the nonprofit organization continues to expand their reach, audiences have the opportunity to interact with each expert to learn more about ways to solve climate change.

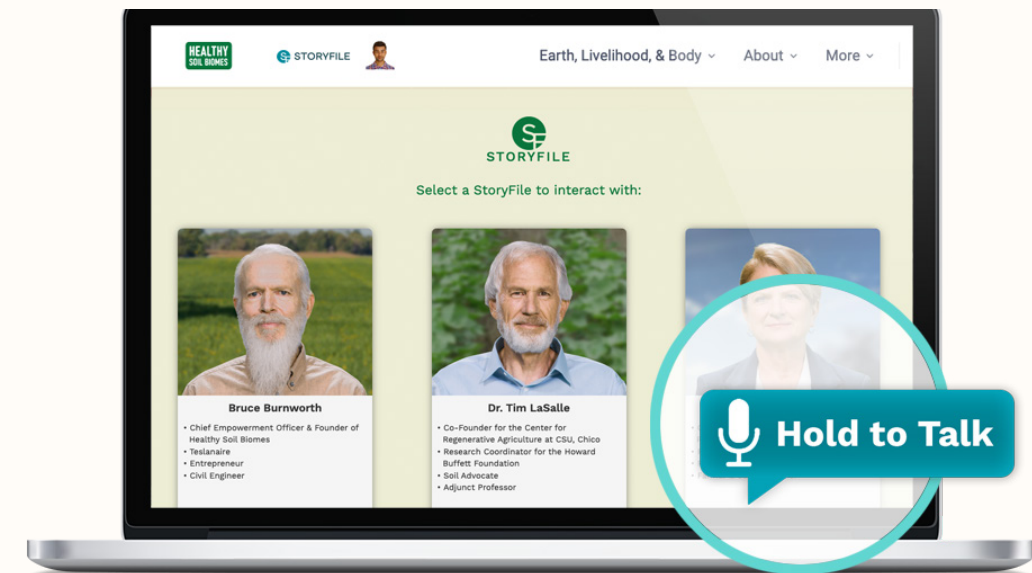

Data-Driven Outcomes

7k+ questions have been asked of the five different Healthy Soil experts.

“

Hi. I'm Bruce Burnworth and I'm the Chief Empowerment Officer for Healthy Soil Biomes. Ask me anything!”
